Thus, the literacy rate among women is just 54%.</p> <p>(a)Both Assertion and Reason is true and Reason is the correct explanation of Assertion (b)Both Assertion and Reason is true and Reason is not the correct explanation of Assertion (c)Assertion is true but Reason is false. (d)Assertion is false but Reason is true.</p>	1
SECTION B		
6	Do you think that political leaders are right to treat people belonging to a caste as 'vote banks'?	2
7	"Minerals are an indispensable part of our lives." Support the statement with two examples.	2
SECTION - C		
8	Elaborate with examples how Women face disadvantage, discrimination and oppression in various ways?	3
SECTION -D		
9	<p>Energy is required for all activities. It is needed to cook, to provide light and heat, to propel vehicles and to drive machinery in industries. Energy can be generated from fuel minerals like coal, petroleum, natural gas, uranium and from electricity. Energy resources can be classified as conventional and non-conventional sources. Conventional sources include: firewood, cattle dung cake, coal, petroleum, natural gas and electricity (both hydel and thermal). Non-conventional sources include solar, wind, tidal, geothermal, biogas and atomic energy. Firewood and cattle dung cake are most common in rural India. According to one estimate more than 70 percent energy requirement in rural households is met by these two; continuation of these is increasingly becoming difficult due to decreasing forest area. Moreover, using dung cake too is being discouraged because it consumes most valuable manure which could be used in agriculture.</p> <p>(i) What are conventional sources of energy? Give two examples. (ii) Explain two disadvantages of using coal as a source of energy?</p>	<p>2 1</p>
