|             |  |              |

|           |  |  |              |
|-----------|--|--|--------------|
| <b>13</b> | <b>globes</b>  | <b>maps</b>  | <b>1X3=3</b> |
|           | <b>A globe is the same spherical shape as that of the earth</b>                            | <b>A map is a flat surface on which the earth or parts of it are represented</b> |              |
|           | <b>A globe is spherical the features of the earth can be viewed as they really are</b>     | <b>Because a map is flat, the features of the earth can get stretched</b>        |              |
|           | <b>The spherical shape of a globe only allows a part of the earth to be seen at a time</b> | <b>The entire earth can be viewed at a glance on a flat map.</b>                 |              |
|           | <b>Due to its shape and size, a globe is not portable</b>                                  | <b>A map can be rolled up and carried around easily</b>                          |              |
|           | <b>Globes can only be used to show the earth in its entirety</b>                           | <b>A map can show a specific area like a country, city or town in detail.</b>    |              |
