- 13) They tried to convince him by saying that all their Bengali friends in America or back in Calcutta had two names. They wrote his new name on a sheet of paper and asked him to copy it over ten times to get used to it. They also assured him that he would always be Gogol for them.
- 14) Claribel was a small yellow canary. When in the space station, it could hang as motionless as a hummingbird though its wings were folded along her sides. Sven Olsen had smuggled her up into the space station out of sheer scientific curiosity to see what would

happen to the bird and how it would operate when it had no weight but could still use its wings.
