 "We Nurture Dreams"

Date: 08/11/2023 Grade: X	Mathematics Monthly Test-2	Max Marks: 20 Time: 50 Minutes
--	---	---

General Instructions:

1. This Question Paper has 3 Sections A, B, and C.
2. Section A has 5 MCQs carrying 1 mark each
3. Section B has 3 questions carrying 2 marks each.
4. Section C has 3 questions carrying 3 marks each.
5. All Questions are compulsory.
6. Draw neat figures wherever required. Take $\pi = 22/7$ wherever required if not stated

Sl. No.	Questions	Marks
Section A		
1	From a point Q, the length of the tangent to a circle is 24 cm and the distance of Q from the centre is 25 cm. The radius of the circle is (A) 7 cm (B) 12 cm (C) 15 cm (D) 24.5 cm	1
2	If tangents PA and PB from a point P to a circle with centre O are inclined to each other at an angle of 80° , then $\angle POA$ is equal to (A) 50° (B) 60° (C) 70° (D) 80°	1
3	If TP and TQ are the two tangents to a circle with centre O so that $\angle POQ = 110^\circ$, then $\angle PTQ$ is equal to (A) 60° (B) 70° (C) 80° (D) 90°	1
4	A medicine capsule is in the shape of a cylinder of diameter 0.5 cm with two hemispheres stuck to each of its ends. The length of the entire capsule is 2 cm. The capacity of the capsule is (A) 0.36 cm^3 (B) 0.35 cm^3 (C) 0.34 cm^3 (D) 0.33 cm^3	1
5	If the circumference of a circle and the perimeter of a square are equal, then (A) Area of the circle = Area of the square (B) Area of the circle > Area of the square (C) Area of the circle < Area of the square (D) Nothing definite can be said about the relation between the areas of the circle and square.	1
Section B		
6	Prove that: The lengths of tangents drawn from an external point to a circle are equal.	2

7	A cubical block of side 7 cm is surmounted by a hemisphere. What is the greatest diameter the hemisphere can have? Find the surface area of the solid.	2
8	Mayank made a bird bath for his garden in the shape of a cylinder with a hemispherical depression on its top. The height of the cylinder is 1.45 m and its radius is 30 cm. Find the total surface area of the bird-bath. (Take $\pi = \frac{22}{7}$)	2
Section C		
9	<p>PQ is a chord of length 8 cm of a circle of radius 5 cm. The tangents at P and Q intersect at a point T (see figure). Find the length TP.</p> 	3
10	<p>A horse is tied to a peg at one corner of a square-shaped grass field of side 15 m by means of a 5 m long rope (see figure). Find</p> <p>(i) the area of that part of the field in which the horse can graze.</p> <p>(ii) the increase in the grazing area if the rope were 10 m long instead of 5 m. (Use $\pi = 3.14$)</p> 	3
11	<p>Meera and Dheera have 12 and 8 coins respectively each of radius 3.5cm and thickness of 0.5cm. They placed their cylinder one over the other to form solid cylinders.</p>  <p>i) Curved surface area of the cylinder formed by Meera is a) $144cm^2$ b) $132cm^2$ c) $154cm^2$ d) $142cm^2$</p> <p>ii) The ratio of the Curved Surface area of the cylinders made by Meera and Dheera is a) 2:5 b) 3:2 c) 1:2 d) 2:7</p> <p>iii) The volume of cylinder made by Dheera a) $154cm^2$ b) $144cm^2$ c) $132cm^2$ d) $142cm^2$</p>	3
