14. Equator: It is an imaginary line drawn midway between the North and South Poles. It divides the Earth into two equal parts, the North Hemisphere and the South Hemisphere.
15. Stereotype is the fixed notion or image of a group/person without any regard for their individuality. This has no rational or scientific basis. For example, the notion that girls cannot drive is a stereotype as there are a lot of good women drivers.
- 16 The Great Bath was the most impressive building structure found in the citadel of Mohenjo Daro. It is rectangular in shape just like a swimming pool. It was made of baked bricks. A layer of tar and bitumen was used to make it watertight. This was lined with bricks, coated with plaster, and made water- tight with a layer of natural tar. There were steps leading down to it from two sides, while there were rooms on all sides.
