Name:

Class & Section:

Roll No:

Q.No.	Questions	Mark
	SECTION A	
	Choose the correct answer	
1	Which of the following is known as the Hunter? a) Ursa Major. b) Scorpius. c) Orion.	1
2	This is formed by a group of stars: a) Heat b) Constellation c) satellite	1
3	This is the solid form of water: a) water b) ice c) water vapour	1
4	What is air called when it blows gently: a) breeze b) storm c) gale	1

Write True or False										
5	The Moon has its own light.	1								
6	The Earth moves around the Sun.	1								
7	The weather around us remains the same all the time.	1								
8	Water exists in nature in solid, liquid and gaseous form.	1								
Section B										
9	<p>Match the following:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tbody> <tr> <td style="padding: 5px;">1) Process by which water changes into water vapour on heating:</td> <td style="padding: 5px;">a) Waning gibbous</td> </tr> <tr> <td style="padding: 5px;">2) Process by which water vapour changes back into water on cooling:</td> <td style="padding: 5px;">b) Evaporation</td> </tr> <tr> <td style="padding: 5px;">3) The phase of the Moon that comes after the full Moon.</td> <td style="padding: 5px;">c) Sirius</td> </tr> <tr> <td style="padding: 5px;">4) The brightest star in the Earth's night sky.</td> <td style="padding: 5px;">d) Condensation</td> </tr> </tbody> </table>	1) Process by which water changes into water vapour on heating:	a) Waning gibbous	2) Process by which water vapour changes back into water on cooling:	b) Evaporation	3) The phase of the Moon that comes after the full Moon.	c) Sirius	4) The brightest star in the Earth's night sky.	d) Condensation	2
1) Process by which water changes into water vapour on heating:	a) Waning gibbous									
2) Process by which water vapour changes back into water on cooling:	b) Evaporation									
3) The phase of the Moon that comes after the full Moon.	c) Sirius									
4) The brightest star in the Earth's night sky.	d) Condensation									
Fill in the blanks										
10	Moon is the natural satellite of the _____.	1								
11	The rainy season is also called the _____.	1								
SECTION C										
12	Name any two gases present in air.	2								
13	Define weather.	2								
14	Name the eight planets.	4
