5.directions

6. oasis

7.pincode

8.astronomers

9.globe

10.cartography

11. A map is a drawing that shows where places or things are.

12.The four main directions are called cardinal points.

13.If we face the rising sun in the morning, our right hand will point to the south and our left hand to the north. In front of us lies the east and behind us is the west.

14. Most maps have an arrow showing the north. In most maps, north lies at the top and south lies at the bottom.

15. Left, right, straight, ahead, behind are some of the directional words, we use them to guide a person to a particular place.
