

QUESTION BANK

Grade 7- Geography

Chapter 6 Natural Vegetation and Wildlife

A: Choose the correct answer.

1. Mosses and Lichens are found in

- a. Desertic vegetation
- b. Tropical evergreen forest
- c. Tundra vegetation

2. Thorny bushes are found in

- a. Hot and humid tropical climate
- b. Hot and dry desertic climate
- c. Cold polar climate

3. In tropical evergreen forest, one of the common animals is :

a. Monkey

b. Giraffe

c. Camel

4. One important variety of coniferous forest is :

a. Rosewood

b. Pine

c. Teak

5. Steppe grassland is found in

a. Africa

b. Australia

c. Central Asia

6. Tropical grasslands are also known as the

a. Savannah

b. Pampas

c. Veld

Very short answer type questions.

7.Name the factors that affect the growth of natural vegetataion?

8.What do you know about Flora and Fauna ?

9.What do you mean by natural vegetation ?

10.What are the different types of natural vegetation ?

11.Write down the types forests and grasslands ?

12.In which areas are the temperate deciduous forests found?

13.Name the two hard wood trees commonly found in tropical evergreen forest?

14.In which part of the world are tropical deciduous forest found ?

15.In which climatic conditions are citrus fruits cultivated?

16.Mention the uses of coniferous forest?

17.In which part of the world is seasonal grass land found?

Give reasons.

18.The animals in the polar region have thick fur and thick skin.

19. Tropical deciduous trees shed their leaves in the dry season.

20. The type and thickness of vegetation changes from place to place.

ANSWER KEY

1. Tundra vegetation

2. Hot and dry desertic climate

3. Monkey

4. Pine

5. Central Asia

6. Savannah

7. The factors which affect the natural vegetation are :

Rainfall, Temperature, Sunlight, Moisture, Elevation, Slope, Thickness of soil.

8.The plants kingdom of the earth is called the Flora,while the animals kingdom is termed as the Fauna.

9.The natural growth of plant life or flora from the smallest grass to the tallest trees is called the natural vegetation.

10.Natural vegetation is generally classified in to three broad categories Forest,Grasslands and Shrubs.

11.FOREST:

Tropical evergreen forest

Tropical deciduous forest

Temperate evergreen forest

Temperate deciduous forest

Mediterranean vegetation

Coniferous forest

GRASSLANDS:

Temperate grassland

Tropical grassland

12.These forests are found in New Zealand,Japan,North-East China,North-East USA.

13.Rosewood and Ebony.

14. Tropical deciduous forests are found in the large part of India, northern Australia and in central America.

15. Citrus fruits are cultivated in the Mediterranean climatic conditions.

16. For uses of coniferous forests.

a : Coniferous forests provide softwood, It is used in making pulp for paper industry.

b : The match making industry gets softwood from coniferous forest.

c: Softwood is also used in making package boxes.

17. Seasonal grass land is found in the Savannah region of Africa. It gets dried up in the dry season.

18. Because polar regions are very cold, animals have to protect themselves from cold by thick fur and thick skin.

19. Because during the dry season, rainfall is scarce and water supply to plants and trees through their root is reduced.

20. Because climate, height, slope and thickness of the soil all these conditions are vary from place to place, natural vegetations are also vary according to these factors.
