Section B (Subjective type questions)	
17	Why are trees important for our surroundings? Ans. Trees help to keep the air clean because the leaves trap the dust from the air. Trees clean the harmful gas out of the air we breathe. Trees also give us the air we breathe. Trees help to bring rain and make the weather cool. Trees make our surroundings beautiful.
18	Which parts of the tree take in substances needed to make food? Ans: The root and the leaves.
19	Where on a tree would you find the bark? Ans: We would find the bark on the surface of the trunk of the tree.
20	How do trees help to clean the air we breathe? Ans: When the leaves make food, they use up a harmful gas in the air, thereby, making the air cleaner for us to breathe.
21	Name three ways in which trees in the forest are useful to us? Ans: The trees in forests are used to make useful products like medicines, rubber, paper and perfume. They also offer homes to many kinds of wild animals. The trees give us the air to breathe and make the air cleaner. The trees also make the soil better and help bring rain to make the weather cool.
22	How does eating on banana leaves or other plates made of leaves help the earth? Ans. If we eat on banana leaves, we will not use plastic plates. As plastic harms the Earth and pollutes it, it is better to eat on banana leaves or other plates that are made of leaves. Leaves decompose faster compared to plastic plates.
