	Long Answer Type Questions	
10.	<p>How has information and communication technology increased the pace of globalisation? Explain. Ans. Information and communication technology increased the pace of globalisation. Information and communication technology (IT) has played a major role in spreading out production of services. In recent times, technology in the areas of telecommunications, computers, Internet has been changing rapidly. Telecommunication facilities (tele- graph, telephone including mobile phones, fax) are used to contact one another around the world, to access information instantly, and to communicate from remote areas. This has been facilitated by satellite communication devices. Computers have now entered almost every field of activity. You might have also ventured into the amazing world of internet, where you can obtain and share information on almost anything we want to know. IT has created various new opportunities.</p>
