erfect Competition, all firms invariably get	1
in i	_
num average cost and incur no selling cost	
	firms produce goods that are identical in all istic competition, the goods are not identical entry in perfect competition but monopolistic any such problems entry in monopolistic competition but perfect any such problems there are many firms of relatively smaller for monopolistic competition  of a characteristic of perfect competition?  nd sellers sellers about product prices insiderable amount on advertising or exit from the industry  we the fewest number of firms?  ess has to make different types of decisions, run. Which of the following is a short run industry  for a product disales promotion in maximise profits

	a) Both Assertion (A) and Reason (R) are true, and Reason (R) is the correct explanation of Assertion (A). b) Both Assertion (A) and Reason (R) are true, but Reason (R) is not the correct explanation of Assertion (A). c) Assertion (A) is true, but Reason (R) is false. d) Assertion (A) is false, but Reason (R) is true	
7	Assertion (A): The determination of price in a Perfect competition market is a study of microeconomics.  Reason (R): Determination of a price only affects the individual market and not the economy as a whole.  a)Both Assertion (A) and Reason (R) are true, and Reason (R) is the correct explanation of Assertion (A).  b)Both Assertion (A) and Reason (R) are true, but Reason (R) is not the correct explanation of Assertion (A).  c)Assertion (A) is true, but Reason (R) is false.  d)Assertion (A) is false, but Reason (R) is true.	1
8	Assertion (A): Perfect competition prevails when the demand for the output of each producer is perfectly elastic.  Reasoning (R): A single uniform price prevails under perfect competition which is determined by the interaction of demand and supply.  a) Both Assertion (A) and Reason (R) are true, and Reason (R) is the correct explanation of Assertion (A).  b) Both Assertion (A) and Reason (R) are true, but Reason (R) is not the correct explanation of Assertion (A).  c) Assertion (A) is true, but Reason (R) is false.  d) Assertion (A) is false, but Reason (R) is true.	1
9	State whether the following statements are true or false. A commodity with a large number of close substitutes shows high elasticity of demand.	1
10	. Statement (1): Perfect competition hypothetical situation.  Statement (2): Under perfect competition, the government decides the prices of all the products and services.  (1) is correct and (2) is incorrect.  (1) is incorrect and (2) is correct.  Both (1) and (2) are correct.  Both (1) and (2) are incorrect.	1
11	A form of the market in which there are a large number of buyers and sellers and the products are homogeneous and sold at a uniform price is called	1

	) M 1	
	a) Monopoly	
	b) Oligopoly	
	c) Perfect Competition	
	Monopolistic Competition	
12	In which market form are average revenue and marginal revenue of firm always	1
	equal?	
13	In the context of perfect competition, which one of the following statements is not correct?  a) Firm has full control over price	1
	b) Horizontal straight line demand curve of the firm	
	c) Freedom of entry and exit	
	Selling cost do not exist	1
14	On the basis of the above diagram, what does the perfectly elastic demand curve D indicate?  a) The firm can sell any amount of its output at the prevailing price. b) The firm has no control over price. c) The firm is to accept the price as determined by the market forces of demand and supply. d) All of these.	
15	Market equilibrium is a situation when  a) market demand>market supply b) market demand=market supply c) market demand=market supply None of these	1
16	How is the price of a commodity affected when its demand increases more than supply?	1
17	If both demand and supply shifts right in the same direction, in the same	1
	proportion, what is the impact on price?	
18	See the picture and answer.	1

What is the equilibrium price floor is:  a) Maximum price ceiling b) Minimum price ceiling Maximum price ceiling Maximum price floor c) Minimum price floor c) Minimum price floor g) State any one commodity on which price ceiling is imposed in India.  21 Which one is not a feature of Perfect competition market? (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  22 Which of the following is a characteristic of perfect competition market? (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		Y-Axis	1
What is the equilibrium level of price and quantity?  Alternative name of price floor is:  a) Maximum price ceiling b) Minimum price floor c) Minimum price eling Maximum price eling Maximum price floor  20 State any one commodity on which price ceiling is imposed in India.  1 (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  2 Which of the following is a characteristic of perfect competition market? (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  2 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  2 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		$\uparrow$	
What is the equilibrium level of price and quantity?  Alternative name of price floor is:  a) Maximum price ceiling b) Minimum price floor c) Minimum price eling Maximum price eling Maximum price floor  20 State any one commodity on which price ceiling is imposed in India.  1 (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  2 Which of the following is a characteristic of perfect competition market? (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  2 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  2 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		P	
What is the equilibrium level of price and quantity?  Alternative name of price floor is:  a) Maximum price ceiling b) Minimum price floor c) Minimum price eling Maximum price eling Maximum price floor  20 State any one commodity on which price ceiling is imposed in India.  1 (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  22 Which of the following is a characteristic of perfect competition market? (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price (b) Minimum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		S D	
What is the equilibrium level of price and quantity?  Alternative name of price floor is:  a) Maximum price ceiling b) Minimum price floor c) Minimum price eling Maximum price eling Maximum price floor  20 State any one commodity on which price ceiling is imposed in India.  1 (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  22 Which of the following is a characteristic of perfect competition market? (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price (b) Minimum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
Alternative name of price floor is:  a) Maximum price ceiling b) Minimum price floor c) Minimum price ceiling Maximum price floor  20 State any one commodity on which price ceiling is imposed in India.  21 Which one is not a feature of Perfect competition market? (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  22 Which of the following is a characteristic of perfect competition market? (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		Q Quantity A-Axis	
a) Maximum price ceiling b) Minimum price floor c) Minimum price ceiling Maximum price floor  20 State any one commodity on which price ceiling is imposed in India.  21 Which one is not a feature of Perfect competition market? (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  22 Which of the following is a characteristic of perfect competition market? (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		^	
b) Minimum price floor c) Minimum price ceiling Maximum price floor  20 State any one commodity on which price ceiling is imposed in India.  21 Which one is not a feature of Perfect competition market? (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  22 Which of the following is a characteristic of perfect competition market? (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true	19	*	1
c) Minimum price ceiling Maximum price floor  20 State any one commodity on which price ceiling is imposed in India.  1 Which one is not a feature of Perfect competition market?  (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  22 Which of the following is a characteristic of perfect competition market?  (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price (d) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		· · · · · · · · · · · · · · · · · · ·	
Maximum price floor  State any one commodity on which price ceiling is imposed in India.  Which one is not a feature of Perfect competition market?  (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  Which of the following is a characteristic of perfect competition market?  (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price (d) Maximum price (e) Maximum price None of these  Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
State any one commodity on which price ceiling is imposed in India.  1 21 Which one is not a feature of Perfect competition market?  (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  Which of the following is a characteristic of perfect competition market?  (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		7	
Which one is not a feature of Perfect competition market?  (a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  Which of the following is a characteristic of perfect competition market?  (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		1	
(a) Perfect knowledge (b) Homogeneous product (c) Price discrimination Freedom of entry and exit  Which of the following is a characteristic of perfect competition market?  (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  A state in which market demand is equal to market supply: (a) Equilibrium price (b) Maximum price (c) Maximum price None of these  Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true	20	State any one commodity on which price ceiling is imposed in India.	1
(b) Homogeneous product (c) Price discrimination Freedom of entry and exit  Which of the following is a characteristic of perfect competition market?  (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price (d) Maximum price None of these  Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true	21		1
(c) Price discrimination Freedom of entry and exit  Which of the following is a characteristic of perfect competition market?  (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price (d) Maximum price None of these  Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
Freedom of entry and exit  Which of the following is a characteristic of perfect competition market?  (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
Which of the following is a characteristic of perfect competition market?  (a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
(a) Single seller (b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true	22		1
(b) Product differentiation (c) Price discrimination Perfect mobility  23 A state in which market demand is equal to market supply: (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products. (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true	22		1
(c) Price discrimination Perfect mobility  A state in which market demand is equal to market supply:  (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
Perfect mobility  A state in which market demand is equal to market supply:  (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
A state in which market demand is equal to market supply:  (a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
(a) Equilibrium price (b) Minimum price (c) Maximum price None of these  24 Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true	23		1
(c) Maximum price None of these  Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true		(a) Equilibrium price	
None of these  Read the following statement carefully: Statement 1: Rationing is a consequence of Price floor. Statement 2: To prevent black marketing government have to resort to rationing of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
Read the following statement carefully:  Statement 1: Rationing is a consequence of Price floor.  Statement 2: To prevent black marketing government have to resort to rationing of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
Statement 1: Rationing is a consequence of Price floor.  Statement 2: To prevent black marketing government have to resort to rationing of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
Statement 2: To prevent black marketing government have to resort to rationing of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true	24		1
of the products.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true			
<ul><li>(a) Statement 1 is true and statement 2 is false</li><li>(b) Statement 1 is false and statement 2 is true</li><li>(c) Both statements 1 and 2 are true</li></ul>			
<ul><li>(b) Statement 1 is false and statement 2 is true</li><li>(c) Both statements 1 and 2 are true</li></ul>			
(c) Both statements 1 and 2 are true			
		Both statements 1 and 2 are false	
25 Read the following statements: Assertion (A) and Reason (R). Choose the	25		1
correct alternative from those given below.			_
Assertion (A): Equilibrium price and quantity change when there is a change in	İ		
either demand or supply of the commodity.	ı		
Reason (R): When Supply increases equilibrium price and equilibrium	ı		
quantity both increase.	ı		
Alternatives:	ı		
(a) Both Assertion (A) and Reason (R) are true and Reason (R) is the	ı	(a) Both Assertion (A) and Reason (R) are true and Reason (R) is the	
correct explanation of the Assertion (A)		correct explanation of the Assertion (A)	

	(b) Both Assertion (A) and Reason (R) are true but Reason (R) is <b>not</b> the correct explanation of the Assertion (A)	
	(c) Assertion (A) is true, but Reason (R) is false.	
	Assertion (A) is false, but Reason (R) is true.	
26	Read the following statement carefully: Statement 1: Black marketing is a consequence of Price ceiling. Statement 2: Producers sell products illegally at a price greater than the price fixed by the government.  (a) Statement 1 is true and statement 2 is false (b) Statement 1 is false and statement 2 is true (c) Both statements 1 and 2 are true (d) Both statements 1 and 2 are false	1
27	An increase in number of firms of a particular product would cause:  (a) Fall in equilibrium price and quantity (b) Rise in equilibrium price and quantity (c) Equilibrium price will fall and the quantity will rise (d) Equilibrium price will rise and the quantity will fall	1
28	Demand curve of a firm is perfectly elastic under:  (a) Perfect competition (b) Monopoly (c) Monopolistic (d) Oligopoly	1
29	In the above figure point A and B shows:  (a) Excess demand (b) Excess supply (c) Equilibrium price Equilibrium quantity	1
30	Which of the following is shown in the above figure?  (a) Price ceiling (b) Price floor (c) Excess supply Equilibrium price	1
31	"Under price ceiling the government fixes price higher than equilibrium price" Whether the statement is true or false. Explain with valid reason.	3
32	Using three valid points differentiate between Price ceiling and Price floor.	3

33	Explain two consequence of maximum price ceiling.	3
34	How are the total revenue of a firm, market price, and the quantity sold by that firm related to each other?	3
35	Why is the total revenue curve of a price-taking firm an upward-sloping straight line? Why does the curve pass through the origin?	3
36	Define the implication of :A large number of sellers in perfect competition	3
37	At what level of price do the firms in a perfectly competitive market supply, when free entry and exit is allowed in the market? How is equilibrium quantity determined in such a market?	3
38	If government reduces subsidy on LPG cylinders, how does it affect its market price? What alternative energy sources can be used by the consumers?	3
39	Why does government intervene to affect market equilibrium?	3
40	Why does a firm under perfect competition not lower the price to increase its sales?	4
41	In a situation of perfectly elastic supply, equilibrium price never changes, no matter what the demand is, is it true? Explain Diagrammatically.	4
42	In India, retail price of petrol has significantly fallen during the past six months, but demand for cars has not shown any significant rise. Explain why.	4
43	"Retail tomato prices have seen a significant jump, reaching close to Rs. 154/kg in major cities primarily due to heavy rain fall in the tomato – producing regions." From the above statement explain diagrammatically the effect on equilibrium price and quantity.	4
44	"A decrease in price of complementary good cause a fall in equilibrium price of the commodity."  Whether the given statement is true or false. Give reason with help of diagram.	4
45	Why is a firm under perfect competition a price taker not a price maker? Explain.	4
46	Case based study:  If our income rises, we generally tend to buy more of the goods. More income would mean more pens, more shirts, more shoes, more cars and so on. But there are exceptions. If initially, you are buying coarse grain, how would you take your increase in income now? Perhaps, as a first step, you would discard the consumption of inferiors. Surely, this happens in the deserts of Rajasthan where the rich minority eats wheat while the poor majority eats Bajra as their staple food.  1) The law of demand does not apply to goods. (Normal/	4
	Giffen)  2) Inferior goods are those whose income effect is (Negative/Positive)	

	3)A fall in income of the consumer (in case of normal goods) will cause a) upward movement on the demand curve. b) downward movement on the demand curve c)rightward shift of the demand curve d)leftward shift of the demand curve 4)As a result of rise in consumer's income, the demand curve for coarse-grain (inferior good) a) becomes a horizontal straight line	
	b) becomes a vertical straight line c) shifts to the right d) shifts to the left	
47	A market for a good is in equilibrium. Demand for good 'increases'. Explain the chain effects of this change.	4
48	Explain the implication of free entry and free exit of a firm in the perfect competition market.	4
49	Perfect competition is no competition. How?	6
50	The following headline appeared in The Times of India: "Purchase only made-in-India gadgets."  Use economic theory to analyse the impact of the statement in terms of competition in the domestic market.	6
51	Is FDI (foreign direct investment) in retail trading a step towards competitive market structure? concentration.	6
52	How will a change in price of coffee affect the equilibrium price of tea? Explain the effect on equilibrium quantity also through a diagram.	6
53	A situation of excess demand or excess supply is automatically corrected under perfect competition. Do you agree? Explain the process of correction.	6
54	Explain the price floor with the help of a diagram and write its implications.	6
55	In the period of COVID-19 pandemic the equilibrium price of drug Remdesivir is too high. Explain what possible steps could be taken to bring down the equilibrium price but only through the market forces. Also explain the series of changes that would occur in the market.	6
56	Explain the implications of the following in a perfectly competitive market:  (a) Large number of buyers.  (b) Large number of sellers.  (c) Freedom of entry and exit to firms.	6
57	Explain through diagramms all three possible situations of a simultaneous rightward shift of both the demand and supply curves on equilibrium price and quantity.	6

# **ANSWER**

1	Answer: a
2	Answer: a
3	Answer: c
4	Answer: a
5	Answer: d
6	Correct answer is option 'C'
7	Correct answer is option 'A'.
8	. Correct answer is option 'C'
9	Ans: True
10	. Answer: A
11	(C) Perfect Competition
12	In perfect competition market firm, average revenue and marginal revenue of a firm always equal.
13	(A) Firm has full control over price.
14	(D) All of these.
15	c) market demand=market supply
16	When demand increases more than supply, the equilibrium price of a commodity will rise.
17	Equilibrium price remains constant.
18	OP- equilibrium price OQ- equilibrium quantity
19	c) Minimum price ceiling
20	In India, price ceiling is imposed on wheat, rice, sugar, kerosene oil etc. (write any one)
21	(c) Price discrimination
22	(d) Perfect mobility
23	(a )Equilibrium price
24	(b) Statement 1 is false and statement 2 is true
25	(c) Assertion (A) is true, but Reason (R) is false.
26	(c) Both statements 1 and 2 are true
27	(c) Equilibrium price will fall and the quantity will rise
28	(a) Perfect competition
29	(b) Excess supply
30	(a) Price ceiling
31	False. Under price ceiling the government fixes price lower than equilibrium price to the concerned commodity remains within the reach of the poorer section to the society.
32	Price Ceiling: 1. It means maximum price of a commodity that the sellers can charge.  2. Government fixes price lower than the equilibrium market price  3. It benefits poorer section (consumer) of society  Price floor: 1. It means minimum price of a commodity that producer must get.

- 2. Government fixes price higher than the equilibrium market price.
- 3. It protects the interest of producers
- Maximum price ceiling leads to (i) excess demand and (ii) black marketing. To prevent black marketing, the government may have to resort rationing of the product. Other valid points..
- **34** ANSWER:

Total revenue is defined as the total sales proceeds of a producer by selling corresponding level of output. In other words, it is defined as price times the quantity of output sold.

Total Revenue = Price × Quantity of output sold

$$TR = P \times O$$

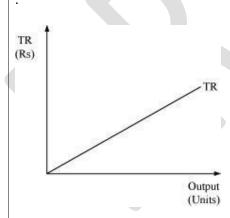

$$TR = PQ$$

In a perfectly competitive market, the market price is given, i.e., a firm acts as a price taker and cannot influence the price. Hence, a particular firm can influence its TR by altering the quantity of output sold.

#### 35 ANSWER:

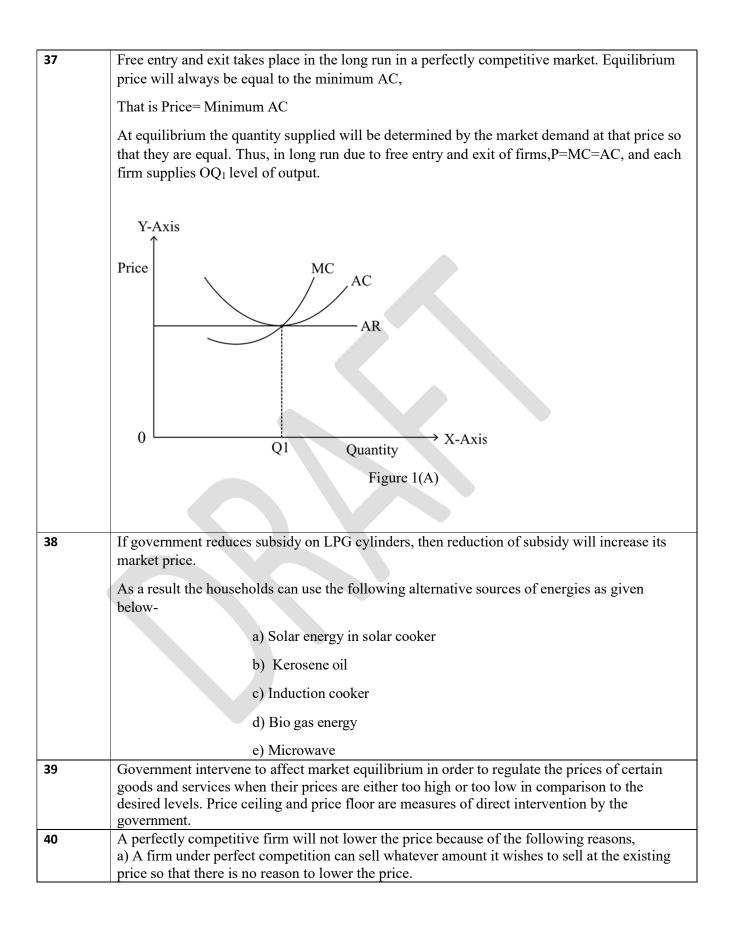

The total revenue curve for a firm in a perfectly competitive market is an upward sloping curve because the price or AR remains constant and MR is also equal to AR. Thus, TR can only be influenced by altering the output sold, as the price remains constant. The increase in TR is in the same proportion as the increase in the output sold.

The curve passes through the origin, which implies that no matter what the price level is, if the output sold is zero, TR will also be zero.

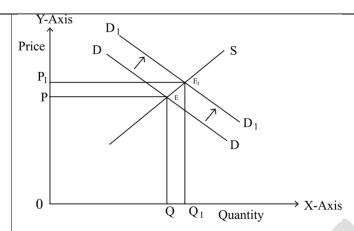

### 36 Answer:

A perfectly competitive market is controlled by the existence of a large number of sellers and buyers of a product, which means that no buyers or sellers will purchase and sell shares that are so large that it will impact the total purchase and sale in the market.

	b) An individual firm under perfect competition is such a small supplier in the market that by
	lowering the price, it cannot fulfill the entire market demand for the commodity. Accordingly, the policy of capturing market by lowering the price will fail.
41	Yes, it is true. Equilibrium price will remain unchanged when supply is perfectly elastic
	whether demand increases or decreases. In the fig here, price remains constant at OP when
	demand increases to $D_1$ and also remains constant at OP when demand decreases to $D_2$ .
	Y-Axis ↑ D <sub>1</sub>
	Price
	$D_2 \leftarrow \rightarrow$
	P
	$D_1$
	D
	$D_2$
	$0 \xrightarrow{\text{Quantity}} X\text{-Axis}$
42	Car and petrol are complementary goods. A significant fall in the price of petrol is expected to
	induce a rise in demand for cars. But, it did not happen. The reason is as this:
	Car is expensive consumer good. Demand for cars is expected to rise only due to any one or
	more of the following factors:
	(1) There is a significant rise in income of the buyers,
	(2) There is a significant fall in the price of cars.
	(3) There is a significant cut in the interest rate for car loans. None of these factors has
	shown any positive change during the past six months. Accordingly, demand for cars has not
	shown any rise in response to fall in petrol price in India.
43	The statement explains the shortage to tomato due to heavy rainfall so the supply of tomato
	decreases but the demand remains constant due to fastival season therefore equilibrium price
	rises and equilibrium quantity decreases.
44	Expalnation with graphs of demand and supply curves- Fasle.
-7-7	A decrease in price of complementary good cause a rise in equilibrium price of the
	commodity. Because decrease in price of complementary good means increase in demand for
	the said commodity. For example if petrol prices go upward demand of motorbike will
	decrease people will prefer bycycle or electric bike instead of petro bike.
	Diagram
45	An individual firm under perfect competion is a price taker owing to the following reasons:
	(i) An individual firm under perfect competion makes such a small contribution to the
	market supply, that toral supply remains unaffected by any change in the firm's
	supply.
	(ii) All firms in the market are selling homogeneous product. Accordingly, even partial
	control over price is not possible through product differentiation.
	(iii) If any firm tries to fix its own price it would not succed. Higher than market price would drive the buyers to a large number of other sellers.
	would urive the ouyers to a rarge number of other seriers.

	(iv) If it fixes price lower than market price would be an irrational decision when any amount of the commodity can be sold by a firm at the existing price.
46	Answer Key: 1)Giffen 2)Negative 3)Leftward shift of the demand curve 4)Shifts to the left
47	Answer:  The chain effects of this change are:
	<ol> <li>When the price is constant, surplus demand emerges</li> <li>This also increases the competition among the buyers insisting them to raise the price</li> <li>A rise in the price of a product cause fall or decrease in the demand and expansion or rise in supply</li> <li>The cost of the product continues to increase until the market is balanced at a greater price</li> </ol>
48	Answer: The implication of free entry and free exit of a firm in the perfect competition market is that in this market structure, no company earns an unusual profit. Each company just earns a normal profit.
49	Ans. Because a firm under perfect competition can sell whatever amount it wishes to sell at the existing price. It only has to adjust its output and supply; there is no price war or price competition in the market. Also, there is no commodity competition because all producers of a commodity are selling only homogeneous product; there is no product differentiation.
50	Ans. Often this heading comes as an appeal by the government to the citizens of the country. This appeal is expected to offer protection to the domestic industry from foreign competition. Competition in the domestic market is likely to reduce. The market will drift more towards oligopolistic structure in which a few domestic firms dominate the market.
51	Ans. FDI in retail trading is expected to promote competitive market structure. But, a market structure in which there is competition among a few. Because, only big firms can bring FDI. Once big firms enter the market, they tend to increase their control of the market through heavy advertisement. Initially, these firms may sell their product at a lower price, lower than the domestic producers. This is called 'price-cutting'. But once they achieve a strong foot-hold, they start exploiting the market by charging higher and higher price. There is a competitive market structure, but with high market concentration.
52	Coffee and tea are substitute goods. Let us assume that the price of coffee increases. This will cause a shift in demand curve for tea to the right as shown in the figure 5.

In the figure 5, DD is the initial demand curve and SS is the initial supply curve related to tea. E is the initial equilibrium where supply and demand curves intersect each other. OP is the equilibrium price and OQ is the equilibrium quantity of tea. When the price of coffee increases, demand curve (for tea) shifts forward as indicated by  $D_1$ . Consequently, equilibrium price (of tea) increases from OP to  $OP_1$  and equilibrium quantity increases from OQ to  $OQ_1$ .

In case price of coffee decreases, demand curve for tea would shift to the left. Consequently, new equilibrium would indicate a fall in equilibrium quantity as well as a fall in equilibrium price.

Yes. Under perfect competition, situations of excess demand or excess supply are automatically corrected through the free play of market forces, called price mechanism.

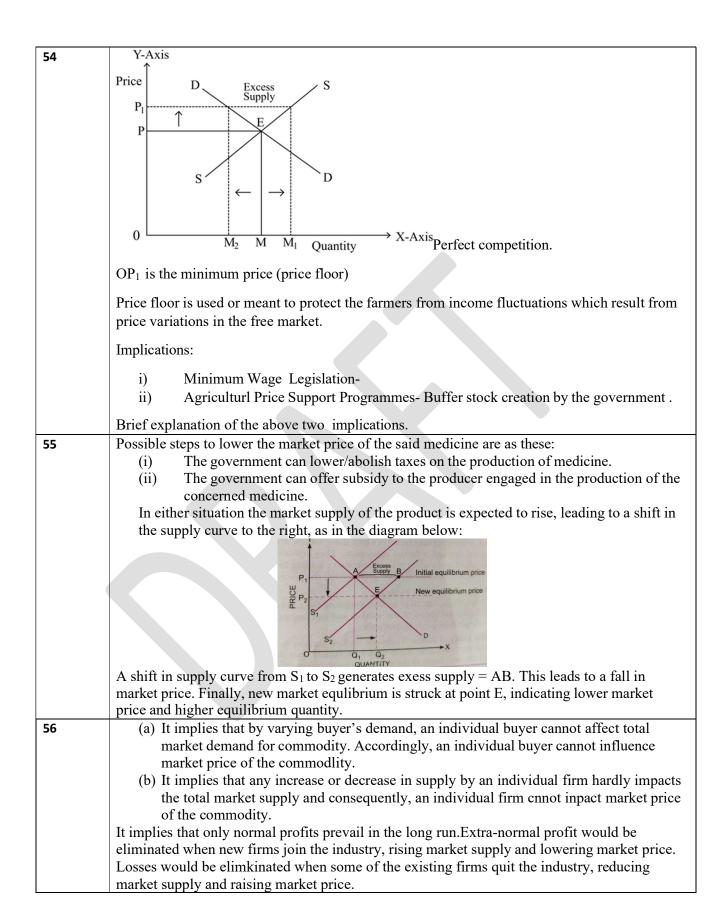

When there is excess supply:

- Market price decreases.
- Decrease in market price leads to extension of demand and contraction of supply.
- The process of extension and contraction continues till excess supply is eliminated.
- New equilibrium is established with lower price and higher quantity than before.

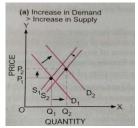

When there is excess demand:

- Market price increases.
- Increase in market price causes contraction of demand and extension of supply.
- The process of extension and contraction continues till excess demand is eliminated.

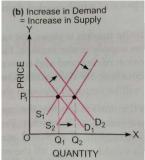

New equilibrium is established with higher price and higher quantity than before.

- There are three possible situations of a simultaneous rightward shift of both the demand and supply curves:
  - (i) When demand increases more than supply, equilibrium price the quantity both rises.

(ii) When demand and supply increase equally, equilibrium price will remain unchange.

(iii) When demand increases less than supply, euqilibrium price will fall and equilibrium quantity will rise.
